

Vigilant for Basics Features

REPETITIVE BILLING

Vigilant Repetitive Billing is ideal for any business that has cyclical billing. At the pre-determined time interval, a series of invoices can be generated by running a single routine. A great time saver for any application, including memberships (i.e. clubs) or subscriptions (i.e. publishers), leases and other service contracts.

Features of Vigilant for Basics Repetitive Billing:

- Billing of customers for the same amount
- Billing of customers for long term rentals
- Billing of customers for services including annual fees, usage charges and others
- Allows fixed contracts and period usage billing
- Tracks contracts renewal and termination dates
- Tracks location of assets leased and rented
- Different billing cycles (daily, weekly, monthly, annually, 2-9 years)
- Bill in advance or 'after the fact'
- Customers can be billed a flat rate and usage fee with minimum and maximum billing
- Multi-level pricing schedules for each customer
- Allows extra billing, either one-time charge or for a defined period
- Adds customer 'on the fly' in the contract screen
