

### Vigilant for Basics Features

## TEC INTERFACE

The TEC MA-1650 provides a direct link between the MA-1650 cash register and Vigilant's accounting software. Businesses can enjoy the speed and convenience of a cash register combined with the inventory and accounting control offered by Vigilant's software.

Features of Vigilant for Basics TEC Interface:

- Eliminates manual entry of financial and inventory information
- Price and product information is sent directly to the registers
- The appropriate general ledger accounts and inventory records are updated by Vigilant at the end of the day
- Supports up to 16 registers in a single location
- Can support up to 32 stores in a single company
- Supports special UPC codes for non-standard inventory items such as foreign merchandise, handicrafts and uncoded customized items
